

## **MONTANA VETERINARY DIAGNOSTIC LABORATORY**

The Montana Veterinary Diagnostic Laboratory provides testing services and procedures to veterinarians, livestock producers, companion animal owners, and the Department of Fish, Wildlife, & Parks as well as many other state and federal agencies for the diagnosis and monitoring of animal diseases. In addition, the laboratory helps protect public health by analyzing raw and processed dairy products produced and sold in Montana and by testing for zoonotic diseases.

The Montana Department of Livestock's Diagnostic Laboratory Division is the only accredited, full-service veterinary laboratory in Montana.
